SEMPREVIVA je kozmetika u potpunosti pripremljena prema standardima prirodne kozmetike i time ne sadrži sintetske komponente. To je kozmetika koja koristi tradicionalna znanja o ljekovitosti biljaka kao i tradicionalnu recepturu.

Kao što svi znamo koža je naš najveći organ. Ona je u izravnom doticaju sa vanjskim svijetom i štiti nas od negativnih utjecaja koji nam stižu izvana. Kako bi bila što uspješnija u svom radu potrebna joj je pomoć, kako iznutra uravnoteženom prehranom i prirodnim dodacima, tako i izvana prirodnim preparatima koji njoj i cijelom organizmu pomažu u radu. **SEMPREVIVA** kolekcija preparata upravo je stvorena za tu namjenu.

Zašto?

Zato što sve naneseno na kožu završi u krvotoku. Zato je važno da sve ono što nanosimo na kožu bude prirodnog porijekla. Npr. prirodni piling nije ni približno agresivan kao sintetički. Prirodne kreme, kao što i naziv kaže, ne sadrže konzervante, umjetne boje, parabene, umjetna bojila, mirise i slično. Prirodne maske imaju svojstva detoksikacije, zaglađuju bore i nepravilnosti kože.

Prirodne kreme i pripravci imaju njegujuća i regenerirajuća svojstva. Potiču mikrocirkulaciju i izravno hrane stanice kože. Takvi pripravci imaju kratak rok trajanja, nakon otvaranja 2 do 3 mjeseca, i čuvaju se na hladnom mjestu ili u hladnjaku.

SEMPREVIVA is cosmetics completely prepared according to the standards of natural cosmetics and therefore does not contain synthetic components. It is cosmetics which is using traditional knowledge about the healing properties of plants and traditional recipes.

As we all know the skin is our largest organ. Skin is in direct contact with the outside world and protects us from negative influences that come to us from outside. In order to be the most successful in its work, the skin needs help, both internally with balanced diet and natural food as well as externally with the natural preparations which help the skin and the entire body in their work. **SEMPREVIVA** collection of products is created just for that purpose.

Why?

Because everything what is applied on the skin ends up in the bloodstream. Therefore, it is important that everything that is applied on the skin be of natural origin. For example, natural exfoliation is not nearly as aggressive as synthetic one. Natural creams, as the name indicates, contain no preservatives, artificial colours, parabens, synthetic dyes, fragrances and so on. Natural masks have detoxifying properties; smooth the wrinkles and skin irregularities.

Natural creams and preparations have nourishing and regenerating properties. They stimulate microcirculation and directly feed the skin cells. Such preparations have short shelf life, after opening 2-3 months, and are being kept in a cool place or in the refrigerator.

HRANJIVA KREMA OD SMILJA

SEMPREVIVA obogaćena vitaminom E

Regenerativna i antiage krema za dnevnu i noćnu njegu lica, vrata i dekoltea.

Glavni sastojak krema je macerat smilja ili Immortelle, eliksir mladosti. Pouzdano dubinski hrani kožu i vraća elasticitet. Smanjuje dubinske bore, a one sitne čini manje vidljivima.

Krema je izuzetno nježna za kožu i posebno djelotvorna kod osjetljive, suhe, dehidrirane i zrele kože. Osvježava, intenzivno hidratizira, umiruje akne i potiče mikrocirkulaciju, te se pokazala veoma dobrom kod svih tipova kože. Koža je nakon SEMPREVIVA vitalnija i pomlađena.

Uporaba: jednom ili dva puta dnevno malu količinu kreme kružnim pokretima nježno nanesite na čistu kožu lica, vrata i dekoltea.

Sastav: macerat smilja, pčelinji vosak, hidrolat lavande, aqua, E vitamin (najvažniji)

ANTIAGE - VITAMINSKI SERUM ZA LICE SEMPREVIVA

Koža oko očiju bit će gleda i mekša. Nakon nekog vremena osjetno se poboljšava čvrstoća kože, borice se zaglađuju, a neugodan izgled podočnjaka se smanjuje. Sprečava prerano starenje kože.

Aktivira obnavljanje stanica epiderme, izbjeljuje pigmentacijske mrlje i staračke pjege, štiti od štetnih utjecaja iz okoline.

Uporaba: količinu sadržaja jednog pritiska aplikatora nježno umasirati po cijelom području lica i vrata.

Sastav: macerat smilja, ulje kikirikija, ulje grožđanih koštice, lanolin, hidrolat lavande, vitamini E i C

ANTIAGING VITAMIN SERUM FOR FACE SEMPREVIVA

The skin around the eyes will be smoother and softer. After a while the strength of the skin is significantly improved, wrinkles are smoothed, and the unpleasant appearance of dark circles around the eyes is reduced. Serum prevents premature skin aging. Activates the cell renewal of the epidermis, bleaches pigmentation spots and age spots, protects against harmful environmental influences.

Usage: The amount of content of one applicator pressure gently massage all over the face and neck.

Composition: macerate of immortelle, peanut oil, grape seed oil, lanolin, lavender hydrolyte, vitamins E and C

NOURISHING CREAM FROM IMMORTELLE SEMPREVIVA enriched with vitamin E

This regenerative and anti-aging cream is for day and night care of face, neck and décolletage.

The main ingredient of cream is macerate of immortelle or xeranthemum, the elixir of youth. Reliable deeply nourishes the skin and restores the elasticity of the skin. It reduces the deep wrinkles, and those little makes less visible. The cream is extremely gentle to the skin and especially effective for sensitive, dry, dehydrated and mature skin. Refreshes, intensely hydrates, soothes acne and stimulates microcirculation and has proven to be very good for all types of skin. After SEMPREVIVA the skin is more vital and rejuvenated.

Usage: Once or twice per day gently apply a small amount of cream in a circular motion on the clean skin of the face, neck and décolletage.

Composition: macerate of immortelle, beeswax, lavender hydrolyte, aqua, vitamin E (most important)

MLJEKO ZA LICE SEMPREVIVA

Nježno, ali učinkovito uklanja make up i nečistoću s lica. Ne isušuje i ne nadražuje kožu, već čuva uravnoteženu vlagu.

Uporaba: mljeko naprskajte na vatru i očistite lice. Ponovite više puta ukoliko je potrebno.
